

I am a VOOM sub. As a consumer I am concerned of the pending 11 licenses at 61.5 sell from Cablevision to Echostar. If VOOM should survive as an independent entity of Cablevision, the FCC should stop the sale of those 11 frequencies to Echostar since VOOM will need them to compete against Echostar and DirecTv. It is in the best interest of consumers to keep a 3rd DBS provider rather than 2 should the finances for VOOM be resolved. Thank you for listening.
